

Dear [BOSS],

As you know, we are looking to spend less time and money supporting underlying IT infrastructure and more time on areas that yield business and competitive value. For that reason, I am proposing that you send me to **Fortinet NSE 4: FortiGate & Infrastructure** training, taking place **March 30 – April 3, 2020** at Pure IT Academy. With the content presented in the trainings, I plan to continue to strengthen my skills and walk away having learned:

- ✓ Implement a meshed or partially redundant VPN.
- ✓ Diagnose failed IKE exchanges.
- ✓ Offer Fortinet Single Sign On (FSSO) access to network services, integrated with Microsoft Active Directory.
- ✓ Deploy FortiGate devices as an HA cluster for fault tolerance and high performance.
- ✓ Deploy implicit and explicit proxy with firewall policies, authentication, and caching.
- ✓ Inspect SSL/TLS-secured traffic to prevent encryption used to bypass security policies.
- ✓ Configure security profiles to neutralize threats and misuse, including viruses, torrents, and inappropriate websites.
- ✓ Apply application control techniques to monitor and control network applications that might use standard or non-standard protocols and ports.
- ✓ Fight hacking and denial of service (DoS).
- ✓ Defend against data leaks by identifying files with sensitive data and block them from leaving your private network.
- ✓ Offer an SSL VPN for secure access to your private network.

This training will specifically focus on providing the inspiration, education and connections I need to be successful in my job. I will return with knowledge that can help the company in these areas:

- ✓ Competitiveness and flexibility
- ✓ Team communication
- ✓ Improvement in worker performance
- ✓ Consistency in duty performance
- ✓ Ensuring worker satisfaction
- ✓ Increased productivity
- ✓ Improved quality of service and products
- ✓ Reduced cost by lessen the outsourced service provided to us
- ✓ Reduction in supervision
